Definitions

New Wage Survey Data Released January 2002

These new wage data are based upon an Occupational Employment Statistics (OES) survey of employers. The data represent wages paid by employers in the fourth quarter of 2000.

Mean Wage

Average of all wage levels reported in the survey for a given occupation within an indicated geographic area.

First Quartile

Represents the wage rate that falls at the 25th percentile within the wage rate distribution for jobs within an occupation, within the specified geographical region. Stated differently, if all the wage rates for an occupation within a region are ranked from the lowest to the highest, the 25th percentile is the wage rate that occurs when counting up to include 25 percent of all the wage rates.

Median Wage

Represents the wage rate that falls at the 50th percentile within the wage rate distribution for jobs within an occupation, within the specified geographical region. Stated differently, if all the wage rates for an occupation within a region are ranked from the lowest to the highest, the median or 50th percentile is the wage rate that occurs when counting up to include half or 50 percent of all the wage rates. When comparing to the mean wage rate, the median can be more representative of an average wage rate when the distribution of wage rates is highly skewed (i.e. heavily weighted with either a few extremely high or extremely low wage rates at the ends of the distribution).

Third Quartile

Represents the wage rate that falls at the 75th percentile within the wage rate distribution for jobs within an occupation, within the specified geographical region. Stated differently, if all the wage rates for an occupation within a region are ranked from the lowest to the highest, the 75th percentile is the wage rate that occurs when counting up to include 75 percent of all the wage rates.
